DeLaval Clover™+ Liner It All Revolves Around You

The patented design of the DeLaval Clover+ liner delivers vacuum levels that are higher at the teat end and lower at the mouthpiece. This delivers a firm, yet gentle grip on the teat throughout the milking cycle. Made from the finest materials, DeLaval Clover+ liner is the “no compromises” liner that can help deliver:

- Improved udder health
- Higher milk yields
- Faster milking
- Greater reliability

“ We are milking 750 cows in our DeLaval parlor, running with an 89lbs herd average and 120,000 SCC.

Our DelPro software shows our 2 min milk KPI consistently over 60% using DeLaval Clover+ liners. ”

**PETE POSNETT, HERD MANAGER,
WILLOW BEHRER, SPRUCE CREEK, PA, USA**

High Performance

Clover+ liner is designed to deliver the highest performance. Trials have shown the DeLaval Clover+ liner milks faster, achieves higher yields, and milks more completely than triangular liners.

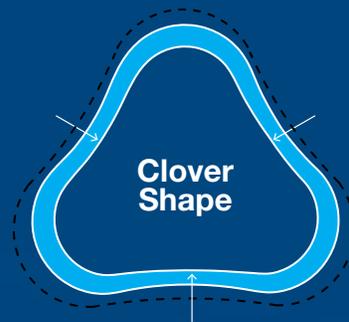

DeLaval Rotary

Clover+ liners should be replaced after 2,500 milkings or after 180 washes, whichever comes first.

Clover+

Stays in the proper milking position with no air escaping during milking

Smooth transition

Between liner barrel and short milk tube

Stimulating performance

Now you can have gentle milking AND achieve high yield
