

# DeLaval MC70 Cluster

Harvest milk **quickly, gently, and completely**, with easy handling clusters that provide **consistently good milking performance and protect udder health**

- No single cluster can meet all today's dairy farming needs. That's why DeLaval offers a wide range of designs, flow capacities, materials, liner assortments, weights and handling characteristics to meet your specific requirements.
- The unique TF (DeLaval Top Flow) technology in many of our clusters, provide dairy producers high flow capacity with stable teat end vacuum. This is essential for good udder health and milk quality.
- DeLaval milking clusters are designed for safe and efficient milking. Choosing a cluster with components that are the right match for your milking system will improve milking productivity, and make life easier for both milker and cow.
- Comes with DeLaval Clover liners for faster, gentler and more complete milk out
