

# DeLaval MPC680 & MM27BC2

- ICAR approved milk meter with built in blood, conductivity, slip, block, and kick monitoring
- Various cow side alarms including blood, conductivity, low yield
- Set various herd management commands such as sort, do not milk, treat at the milking point
- Flow through milk metering with no moving parts and minimal maintenance and service requirements
- ICAR approved milk meter calibration via software instead of labor intensive and cumbersome bucket calibration in the parlor or basement
- Over 21,000 MM27s installed in North America since 2010
