

DeLaval Parlor P500

The DeLaval Parlor P500 represents a whole new approach to moving cows **quickly, calmly and efficiently** through the milking process

- **DeLaval SynchroSweep** – features independently controlled, suspended, non-overlapping sequence gates for a quieter milking environment, greater cow comfort and fast cow exit.
- **DeLaval SynchroArc** - has been designed to increase milking routine efficiency with a smaller footprint and fewer vertical space requirements.
- **DeLaval SynchroControl** – provides more technology, more functions and more information so that your parlor can be operated safely, comfortably and efficiently.
- Features adjustability during installation for different breeds, providing your herd the most comfortable fit possible.
- Designed for minimal downtime during retrofit installations
